SOC-NIDS // THREAT COMMAND

Security Operations Center - Network Intrusion Detection Report

EXECUTIVE SUMMARY

This report contains analysis of 1 security alerts detected by the SOC-NIDS Threat Command system. 1 critical/high severity incidents were identified requiring immediate attention.

KEY METRICS

1	1	0	0
TOTAL ALERTS	CRITICAL/HIGH	MEDIUM	LOW

ATTACK DISTRIBUTION

ALERT DETAILS

Time	Type	Severity	Score	Source	Summary
12:00:00	DoS	HIGH	95.0%	192.168.1.1	Attack with - and [!]

CONCLUSIONS & RECOMMENDATIONS

The SOC-NIDS system continuously inspects network flow telemetry using hybrid ML and signature detection. Continued monitoring, signature updates, and periodic validation of detection thresholds are recommended to maintain optimal network defense.
