SOC-NIDS // THREAT COMMAND

Security Operations Center - Network Intrusion Detection Report

EXECUTIVE SUMMARY

This report summarizes the operational status of the SOC-NIDS Threat Command system. No security intrusions or malicious alerts were detected during this monitoring cycle.

KEY METRICS

0	0	0	0
TOTAL ALERTS	CRITICAL/HIGH	MEDIUM	LOW

ALERT DETAILS

No threat incidents recorded during this monitoring interval.

CONCLUSIONS & RECOMMENDATIONS

The SOC-NIDS system continuously inspects network flow telemetry using hybrid ML and signature detection. Continued monitoring, signature updates, and periodic validation of detection thresholds are recommended to maintain optimal network defense.
